2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

Box No. 1 Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
☐ This opinion has been established on the basis of a translation from the original language into the following language
_____, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
 - a. type of material
☐ a sequence listing
☐ table(s) related to the sequence listing
 - b. format of material
☐ in written format
☐ in computer readable form
 - c. time of filing/furnishing
☐ contained in the international application as filed.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

the same installation location in the cargo-hold floor, both in their erected operating position and in their lowered transfer and storage position;

from which the subject matter of independent claim 1 differs in that the cargo-hold floor is accommodated on a grid structure, comprising longitudinal members and cross members, and anchor points are accommodated in a stationary manner on the grid structure at points at which the longitudinal members intersect the cross members.

- 2.1 The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

The problem addressed by the present invention can therefore be considered that of providing a particularly versatile and lightweight cargo-hold floor with very stable anchor points.

- 2.2 The solution to this problem, as proposed in claim 1 of the present application, involves an inventive step (PCT Article 33(3)) for the following reasons:

It would not be obvious to a person skilled in the art to use this solution, since this solution has not ever been previously proposed in this technical sphere in order to solve this problem.

- 2.3 Claims 2-22 are dependent on claim 1 and therefore likewise meet the PCT requirements for novelty and inventive step.

PCT/EP2005/001324

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

- 3.1 The syntax of claim 1 is defective. The expression "and with locking units (98) which comprise interlocking elements (100, 143) which can be swung open and closed" should not be assigned a verb or noun. As a result, the subject matter of said claim is not clearly defined (PCT Article 6).
- 3.2 In the application, the same components (98) are called both "interlocking support" and "locking support". It is advised to use a single term for this feature.
